Mammography Facility Survey

The Metropolitan Chicago Breast Cancer Task Force is asking for your help in completing this brief mammography facility survey. We are asking you or someone knowledgeable within your institution to complete and return this form to Jennifer Orsi at jennifer_orsi@rush.edu or fax it to Jennifer at 312-563-2448. We will not present or publish information from individual facilities or institutions either as part of the task force or elsewhere. Your name and the names of any colleagues will remain confidential. We will only use your name and contact information if we have further follow-up questions. Thank you in advance for helping to fill in this important picture of access to mammography in Chicago. Instructions: Please fill out ONE form for EACH mammography facility at your institution.

Facility name: ____________________________________________
Address: ________________________________________________
City: __________________________ ZIP __________ Institution affiliation (if any): __________________________
Name of person(s) completing questionnaire: __________________ Phone: __________________
Position or title(s): _______________________________________

Current Capacity:
1. How many hours is your facility performing breast imaging from Monday-Friday? _________
2. How many hours is your facility performing breast imaging on the weekend? _________
3. How many analog (film screen) mammography machines are in operation? _________
4. How many digital mammography machines are in operation? _________
   a. How many of these are Fuji CRM units? _________
   b. How many of these are flat panel (stand-alone) units? _________
5. How many imaging techs dedicated to mammography (>75% of time)? _________
6. How many imaging techs who spend <75% of their time on mammography? _________
7. How many radiologists who are dedicated to breast imaging (>75% of time)? _________
8. How many general radiologists who read mammograms? _________
9. How many screening mammograms does this facility perform? _____ per month
10. How many diagnostic mammograms does this facility perform? _____ per month
11. During operating hours, for what percentage of the time is there at least one attending radiologist on site

   <10%  10-25%  26-40%  41-59%  60-75%  76-90%  >90%  
   [ ]  [ ]  [ ]  [ ]  [ ]  [ ]  [ ]  

What percentage of your patients:
12 Are residents of the city of Chicago
13 Are African-American
14 Are Hispanic
15 Have no private or public insurance
16 Have Medicaid
17 Are IBCCP patients

   <10%  10-25%  26-40%  41-59%  60-75%  76-90%  >90%  
   [ ]  [ ]  [ ]  [ ]  [ ]  [ ]  [ ]  

Computer-Aided Detection

17. Does your facility use Computer-Aided Detection when interpreting mammograms?
   1 □ Yes       2 □ No

18. If yes, please select which mammograms are routinely read with CAD (CHECK ALL THAT APPLY):
   □ All screening mammograms
   □ Screening mammograms with an abnormal interpretation
   □ All diagnostic mammograms
   □ Diagnostic mammograms with an abnormal interpretation

Double-reading of mammograms

19. Does your facility routinely (as usual practice) employ double-reading of mammograms (not including CAD)?
   1 □ Yes       2 □ No

20. If yes, please select which mammograms are routinely double read, not including CAD (CHECK ALL THAT APPLY):
   □ All screening mammograms
   □ Screening mammograms with an abnormal interpretation
   □ All diagnostic mammograms
   □ Diagnostic mammograms with an abnormal interpretation

Performance feedback

21. What types of feedback are provided to radiologists on interpretive performance for screening mammography?
   Recall rate          Monthly          Annually          Less often          Never
   Biopsy rate          □              □                □                   □
   Cancer detection rate□              □                □                   □
   % minimal/early stage □              □                □                   □

What percentage of:

22. Mammograms are read on site at your facility?
   □ <10%         □ 10-25%         □ 26-40%         □ 41-59%         □ 60-75%         □ 76-90%         □ >90%

23. Screening mammograms are read same day as exam?
   □ □                  □                  □                  □                  □

24. Diagnostic mammograms are read same day as exam?
   □ □                  □                  □                  □                  □

25. Normal screening results provided before she leaves?
   □ □                  □                  □                  □                  □

26. Abnormal screening results provided before she leaves?
   □ □                  □                  □                  □                  □

27. Diagnostic results provided before she leaves?
   □ □                  □                  □                  □                  □

Does your facility offer:

28. Diagnostic mammography?  1 □ Yes       2 □ No
29. Breast ultrasound?       1 □ Yes       2 □ No
30. Breast MRI?              1 □ Yes       2 □ No
31. Breast biopsies?         1 □ Yes       2 □ No

For how many months were you unable to fill a position for a:
   mammography technician?________
   breast imaging specialist?________
   general radiologists mammographer?________

As of today, how many days is the wait for:
   a screening appointment? _________
   a diagnostic appointment? _________

Typically, what percentage of mammogram appointments are no-shows? _________

How many minutes are set aside for:
   screening appointments? _________
   diagnostic appointments? _________
